# EXPERTS

EXPERTS IN EDUCATION REFLECT BY TELLING STORIES

[www.experts.story-telling.eu](http://www.experts.story-telling.eu)

## What is the EXPERTS Blog?

EXPERTS is an easy-to-handle weblog area for the exchange of experiences among kindergarten teachers. It is about stories and tales of personally

experienced situations with children in the daily life of kindergarten teachers and day mothers of different countries all over Europe.

## You don't remember anything to tell?

Don't mind about telling exciting, extraordinary, unpublished stories or big problems or events. We would simply like to invite you to tell "little pieces of working life you have encountered in your daily working routine", for example something important for you, or a situation which was difficult to handle, a situation where you were lost for words, a touching experience, a certain problem, situation or event or encounter that you would like to share with other people ...

## WebWHAT? WebLOG? What is a blog?

A Blog (WebLOG) is a type of web site that is usually arranged in chronological order from the most recent 'post' (or entry) at the top of the main page to the older entries towards the bottom. Many blogs provide a commentary or news on a particular subject. Others function as more personal online diaries.

## Write your story in the EXPERTS blog!

... read and comment the stories of other Kindergarten teachers and day mothers.

## Visit the EXPERTS blog:

## Why should you participate?

The EXPERTS project is co-funded by the European Commission and aims at building up a Europe-wide network for kindergarten teachers and day

mothers providing peer support for this group and lifelong learning through personally experienced situations from working life.

## What is it about?

EXPERTS wants to develop a **continuous training environment for early childhood education professionals**. The approach of this European project is based on a storytelling methodology. Kindergarten teachers and day mothers and fathers are invited to tell stories about their experiences as a child, how they were brought up on the one hand as well as stories from their own professional routine on the other hand. Discussion facilities will be offered within a forum supervised by experts.
